➞ DIMENSIONS

Optimised for 480–500 mm seat centres to maximise spectator capacity.

➞ OPTIONS

The Link Spectrum can be configured with a range of optional features to suit specific venue requirements.

Upholstery - Ideal for VIP, corporate and hospitality seating

Marine-grade vinyl upholstery UV resistance, Crib 5 fire protection (BS 5852) and easy maintenance.

Armrests - For enhanced comfort and a premium finish

Available in durable polypropylene or upholstered marine-grade vinyl.

Seat Numbering/Branding Inserts - Recessed seat backrests accommodate self-adhesive aluminium or cost effective polyester inserts

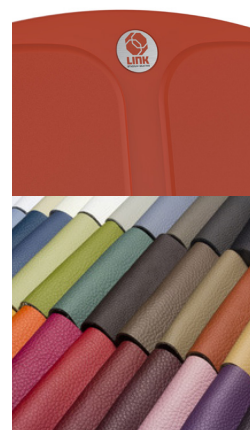

Available with durable aluminium discs or polyester labels, the insert can be customised to display seat numbers, club logos or other venue branding.

Coatings for Support Post - Choose from thermoset or thermoplastic coatings to enhance durability, corrosion resistance and appearance.

Thermoset provides a tough, hard wearing finish, while thermoplastic offers a thicker protective coating that covers both internal and external steel surfaces for maximum corrosion protection.

Fire Retardant Additives (FR)

FR additives can be incorporated into selected materials where required to meet relevant fire safety standards and project specifications.

Please note: We reserve the right to change the spec of the products described in this leaflet at any time. All images are for illustrative purposes only .
