

PROJECT PORTFOLIO

EXPERIENCE & TRACK RECORD

Our portfolio showcases a diverse range of projects varying in scale and scope, with a particular focus on high-impact developments at prominent sporting venues. While our experience spans numerous sectors, this summary highlights our involvement in larger projects of national and regional significance—especially those central to the GAA and other major sports—demonstrating our capacity to deliver at the highest level.

ABOUT US

Links Stadium Seating is a leading provider of innovative, high-quality seating solutions for sports and entertainment venues worldwide. With a strong track record in product design, development, and installation, we deliver tailored seating systems that meet the demands of both permanent and temporary environments.

Our products are manufactured in ISO 9001-accredited facilities, supported by rigorous testing and certification, and backed by comprehensive warranties. From iconic stadiums seating over 50,000 spectators to VIP indoor auditoria, our experience spans the globe—from the Middle East to the USA, and from the Scottish Highlands to Australia.

Company Overview

- **Durability You Can Trust**
Long service life thanks to robust materials and precision engineering.
- **Customisable for Every Venue**
Tailored solutions for general admission, VIP, corporate, and safe standing applications.
- **Efficient Installation**
Proven track record of on-time, hassle-free project delivery—even within tight timeframes.
- **Proven Globally**
Installed in premier stadiums across Europe, the Middle East, USA, and Australia.
- **Modular & Demountable Options**
Flexible systems like the Alto range for temporary or reconfigurable installations.

PROJECT

St. Tiernach's Park – Clones – Ireland

We were proud to deliver a full spectator seating renewal at St. Tiernach's Park as part of a two-phase upgrade led by Ulster GAA.

Following the success of Phase 1 (5,400 seats in 2023), Phase 2 involved the removal of original timber benches and the supply and installation of over 5,800 Link Mirage seats in a custom three-colour scheme. This upgrade dramatically improved comfort, safety, and visual impact at one of Ireland's premier GAA venues.

PROJECT

Croke Park – Páirc an Chrócaigh – Ireland

Croke Park in Dublin, the headquarters of the Gaelic Athletic Association (GAA), is one of Europe's largest stadiums, with a capacity of approximately 82,300 spectators

In 2023, we entered into discussions with Croke Park to undertake the renewal of around 36,000 general admission seats in the lower tier. With a proven track record of delivering reliable seating solutions across numerous GAA venues, we were honoured to be awarded the contract.

The project commenced in autumn 2023 and was delivered on time and within budget, well ahead of the 2024 All-Ireland finals.

PROJECT

Westmeath GAA Stadium – TEG Cusack Park – Ireland

Westmeath GAA selected us to support an affordable, practical seating upgrade at the historic Cusack Park. Our Irish-based team managed the full removal and disposal of outdated timber benches and worn-out tip-up seats. We supplied and installed new Mirage-style seats in the club's signature maroon, fitted to the existing concrete terraces.

The refreshed seating delivered a striking visual uplift, reflecting the club's identity and ambition & we look forward to continuing our role as a trusted partner in future phases of their stadium development.

PROJECT

Glamorgan CCC- Sophia Gardens

Sophia Gardens, the prestigious Test Match venue and home of Glamorgan CCC, underwent major redevelopment in 2007–2008, during which approximately 14,000 Link seats were installed in the new grandstands. After more than 13 years of reliable service, the club decided it was time to refresh the stadium's appearance.

Our Link Spectrum seat was selected again, allowing for a cost-effective upgrade by replacing only the plastic components while retaining the original galvanized steel supports, which remained in excellent condition. This efficient solution delivered a refreshed look with minimal disruption and expense.

PROJECT

Rangers FC- Ibrox Stadium

The world-famous home of Glasgow Rangers is fitted with our Link Mirage seating. We've built a long-standing, successful partnership with the club, progressively upgrading stadium seating to replace outdated assets and enhance revenue potential. Recent work has included upgrades to corporate areas, installation of compact envelope seating, and the use of advanced anchoring techniques to improve overall stadium functionality.

PROJECT

Connacht – GAA Centre of Excellence – County Mayo

Thanks to our strong reputation across Ireland, we were appointed by main contractor Prunty Contracts to supply a reliable tip-up seating solution for Connacht GAA's new Centre of Excellence. Our Spectrum seat was selected for its ability to accommodate a wider seat centre (480–500mm), meeting the venue's specific needs. The white finish complements the club colours and aligns with the clean, modern design of the new facility.

PROJECT

Burnley FC– Turf Moor

Turf Moor, the historic home of Burnley FC since 1883, is the longest continuously used stadium among all 49 Premier League clubs. Ahead of the 2019–2020 season, Burnley once again selected our Link Mirage seats for the lower tier of the James Hargreaves Stand. Within a tight two-week window, our team replaced 3,400 aging seats, completing the upgrade seamlessly before the first match.

The club also opted for nearly 1,500 of our Barrier Seat – M units to enhance crowd management in both home and away sections. Fully compliant with SGSA guidelines, our Barrier Seat range offers a durable, integrated solution for safe standing. This project reflects our ongoing partnership with Burnley FC and our ability to deliver fast, high-quality, safety-led seating upgrades.

PROJECT

Cork GAA Stadium – Páirc Uí Chaoimh – Ireland

This major GAA stadium in Cork underwent a significant three-year expansion and modernization project, transforming it into a state-of-the-art venue with a capacity of 45,000. As part of the redevelopment, Link Mirage seats were chosen to provide both general admission and VIP seating.

Engaged from the early planning stages, we worked closely with architects and project managers to help shape a modern, enhanced spectator experience. Despite the complexity of the refurbishment, we successfully delivered the seating element on time, contributing to the stadium's timely and high-quality completion.

STADIUM INSTALLATION HIGHLIGHTS

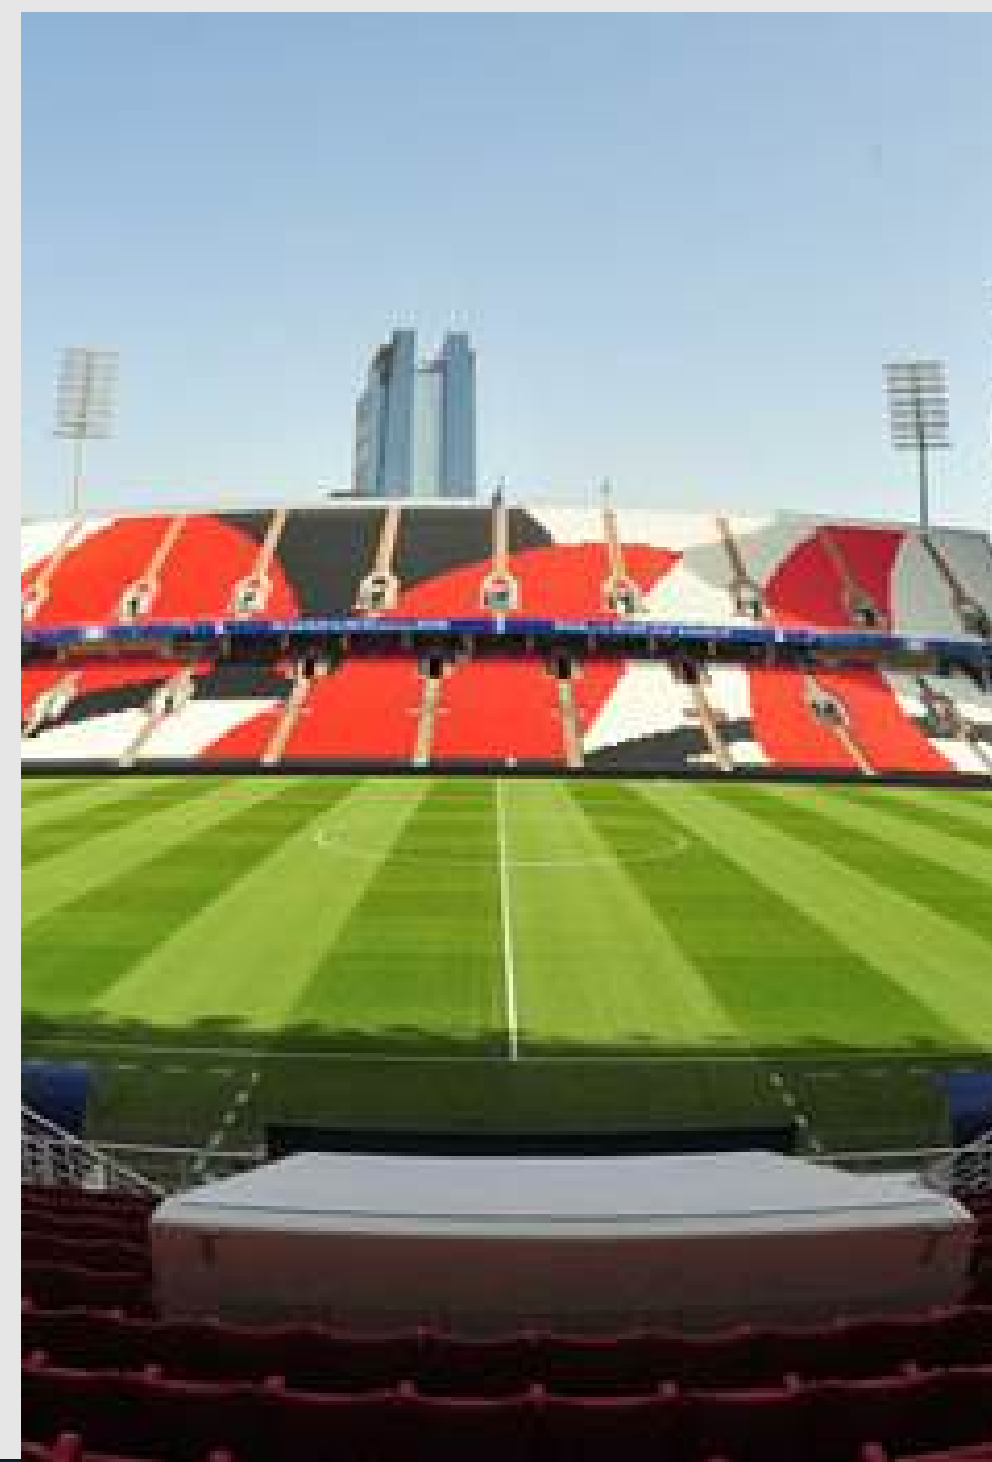

A selection of prominent global sports venues where our seating solutions have been successfully installed, reflecting the trust placed in our products across a wide range of high-profile projects.

LONDON 2012 OLYMPICS – WATER POLO ARENA

One of only three entirely temporary venues within the Olympic Park, the Water Polo Arena was fully fitted with Spectrum seats, integrated into the Alto demountable seating system to deliver comfort, flexibility, and rapid deployment for the Games.

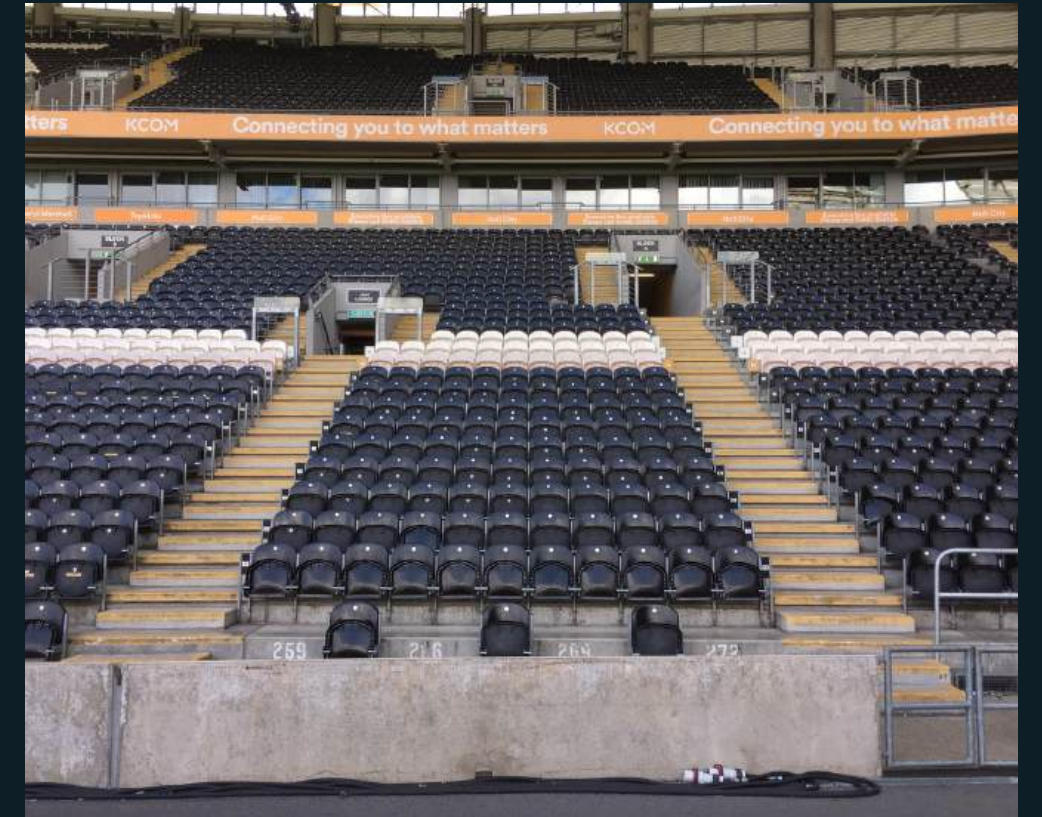

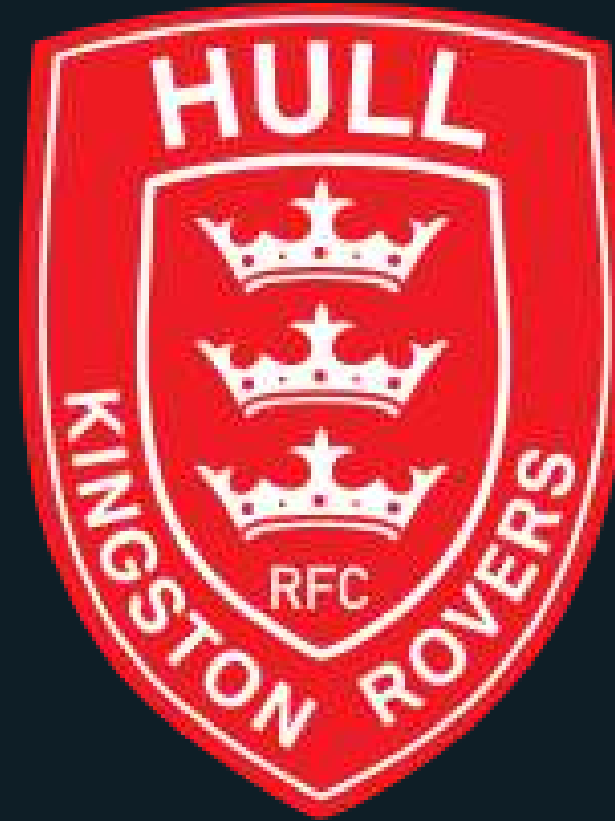

MOHAMED BIN ZAYED STADIUM - ABU DHABI

A landmark new-build in Abu Dhabi, the Mohamed Bin Zayed Stadium—home to Al Jazira FC—was fully equipped with Link seating across general admission and VIP areas. Our durable, high-quality seating solutions helped deliver a modern and comfortable spectator experience, supporting the stadium's role in hosting both domestic and international events.

KCOM STADIUM - HULL / HULL KINGSTON ROVERS

The KCOM Stadium in Hull, home to both Hull City AFC and Hull Kingston Rovers, was fully outfitted with Link seating throughout as part of its original fit-out. As a dual-purpose venue hosting both football and rugby league, it demanded a seating solution that could withstand high-frequency use while offering consistent comfort and visual appeal across general admission and premium hospitality areas. Our robust and stylish seating systems provided the ideal match—ensuring durability, ease of maintenance, and a cohesive look that enhances the spectator experience for every event, from league matches to large-scale tournaments.

STADE BOLLART - DELELIS RC LENS

Located in the city of Lens, Stade Bollaert-Delelis is a historic French football venue and home to RC Lens. As part of a major redevelopment project, the stadium was fully outfitted with our Spectrum seating. This installation significantly enhanced spectator comfort and brought a modern, cohesive look to the venue, aligning with its upgraded facilities and renewed focus on fan experience.

ESTÁDIO DO DRAGÃO - FC PORTO

Located in Porto, Estádio do Dragão is the iconic home of FC Porto and one of Portugal's premier football venues. As part of its original construction ahead of UEFA Euro 2004, the stadium was fully equipped with our Spectrum seating. The installation provided a unified, modern seating solution throughout all spectator areas, combining durability, comfort, and visual consistency in line with the stadium's world-class design.
